

HIGH VOLUME LOW SPEED FANS

APPLICATION

The LHS range of High Volume Low Speed fans are designed to be installed in high ceilings to redistribute air towards floor level, create a cooling effect in summer while they de-stratify the air in winter pushing the warm air down at floor level, for commercial and industrial applications such as warehouses, shopping malls, bar, show room, etc.

CONSTRUCTION

- Upper frame made of painted steel welded structure to protect the motor.
- Decorative canopy to cover the wiring and the ceiling brackets.
- Safety cables and 800mm length downrod provided as standard.
- Specially designed airfoil made from aluminium EN AW 6063 T6. The surface is anodized to avoid corrosion.
- Aerodynamically shaped blade tips made in plastic.
- Hub provided with safety ring.
- Aesthetic hub cover made in plastic.
- High efficiency three-phase EC brushless motor, which are specifically designed for HVLS application, 200-480Vac/3ph/50/60Hz, IP65, with integrated electronic system and EMC filters. Suitable for S1 continuous service. Speed controllable.

FEATURES & BENEFITS

- Top silent operation thanks to the gearless motor and the special airfoil design.
- Ideal to integrate the HVAC system, for energy saving and CO2 emission reduction.
- In winter months they are suitable to de-stratify the air pushing the warm air towards the floor level, so to even the temperature and to prevent the HVAC system to run as hard.
- In summer time the constant and gentle breeze eliminates hot and cool spots in the building by improving the internal environment and creating a natural cooling effect. The air movement also helps keeping the insects away.
- No ordinary maintenance.
- Robust steel structure for long life.
- Key safety features (main security wire, additional stabilising cables, hub safety ring).
- Blade tips to optimise performances and acoustic comfort.
- Hub cover to protect the motor from dust and for a better aesthetics.
- Simplified electrical connection: pre-cabled.
- Integrated EMC filters to prevent electromagnetic interference from other devices.

- Fan are suitable for operating temperatures from 0°C to +50°C.
- Unit performances are tested to the latest AMCA standard meaning accurate information that can be relied upon.
- Designed and manufactured in accordance with Machinery Directive (MD), Low Voltage Directive (LVD), Electromagnetic Compatibility Directive (EMC).

ACCESSORIES

- Different length downrod
- Remote controllers
- I-Beam fixing kit
- Glulam fixing kit

Performance @ 400Vac 50Hz

Description	Fan Diameter	Max Rotation Speed	Max Thrust	Electrical power	Max Air Flow AMCA 230-15			Max Air Flow AMCA 230-99		
					cfm	m ³ /h	SPI ⁽¹⁾ W/(m ³ /s)	cfm	m ³ /h	SPI ⁽¹⁾ W/(m ³ /s)

CTRL-HS

- 3,5" TFT full touch-screen colour graphic display control panel
- Provides a single point of control for up to 4 units
- To control:
 - ✓ Speed
 - ✓ Fan direction
 - ✓ Alarm warning
- RS-485 ModBus connection
- 24 VaC 50/60Hz (max 4 VA) or 12 ÷ 30VDC (max 2W)
- IP30

CTRL-A

- Potentiometer with front knob to adjust the motor speed
- Provided with two-pole switch (ON/OFF)
- Front yellow led to indicate that the load is active
- Controls one fan only
- 230V~ 50/60Hz
- Supplied with IP55 wall surface box

CTRL-XWS

- To control the ventilation units according to temperature and wind speed
- Dimensions: 160x110x81 mm
- Three operating modes:
 - Mode A: control of ventilation according to wind speed by means of an anemometer (accessory on request) and blocking of the fan according to temperature
 - Mode B: control of ventilation according to room temperature using 1 temperature probe (supplied as standard) and blocking of the fan according to wind speed
 - Mode C: control of ventilation according to room temperature by means of 2 temperature probes (additional temperature probe on request) to manage winter destratification and summer comfort ventilation
- Regulation 0-10V
- 230Vac - 50/60Hz
- Can control up to 10 units
- IP65 wall-mounted casing
- 1 temperature probe included
- Wind speed probe (anemometer) available on request
- Additional temperature probe for Mode C available on request

AN-SY

SV-10K

CTRL-XTHI

- To control the ventilation units according to temperature and THI level
- Dimensions: 160x110x81 mm
- Shower control and auxiliary ventilation activation
- Regulation 0-10V
- 230Vac - 50/60Hz
- Can control up to 10 units
- IP65 wall-mounted casing
- Temperature probe included
- Humidity probe available on request

Downrod

- Downrod made from painted steel
- Different length downrod on request

Description	Weight (kg)	Dimensions (mm)
TUB300	1,3	50x50x3 - L=300
TUB1500	6,6	50x50x3 - L=1500
TUB3000	13,2	50x50x4 - L=3000

I-Beam

- I-Beam fixing kit suitable for standard IPE, HEA and HEB profiles
- Fixing screws supplied

Model	Range
IPE	from IPE180 to IPE600
HEA	from HEA100 to HEA400
HEB	from HEB100 to HEB300

Glulam

- Fixing kit suitable for rectangular beams with base between 100mm and 260mm
- Fixing screws supplied
